SENG 310

Usability Testing Assignment

1. Purpose of the Assignment (System Usability Scale – SUS)

The purpose of this assignment is to introduce students to usability evaluation methods used in Human–Computer Interaction (HCI). In this study, you will conduct a usability test using the System Usability Scale (SUS) to evaluate the usability of a real-world website.

You will analyze how easily users can interact with a selected website and measure perceived usability through standardized questionnaires.

This assignment will help you:

- understand usability testing methodology
- learn how to apply the System Usability Scale (SUS)
- collect and analyze user feedback
- identify usability problems
- propose UX improvements

2. Website Assignment

Each student will evaluate one website selected from the list provided by the instructor (See Appendix I).

The websites belong to the following categories:

- Banking
- E-Commerce
- Online Market / Grocery
- Food Delivery
- Travel / Ticket / Reservation

The full list of websites will be provided in a separate table including:

- Website number
- Website name
- Website URL
- Category
- Required tasks

Each student is responsible for only one website.

3. Participants

Each usability test must include at least 20 participants.

Requirements:

- Participants should be real users, not only classmates.
- Participants must be 18 years or older.
- Participants should not work for the company whose website is being tested.
- Each participant must complete the SUS questionnaire after performing the tasks.

Recommended participant sources:

- friends
- family members
- university students
- colleagues
- online volunteers

Minimum requirement:

20 participants × 1 SUS survey per participant

More participants are encouraged.

4. Testing Procedure

Each participant must complete the following steps.

Step 1 – Introduction

- Explain briefly:
- This is a usability study for a university course
- The participant is evaluating the website, not themselves
- There are no right or wrong answers

Step 2 – Task Completion

- Participants must perform three tasks on the assigned website.
- Each category has three common tasks defined by the instructor.

Task types:

Banking

FACULTY OF ENGINEERING AND
NATURAL SCIENCES

1. Kredi kartı sayfasını bulun / Find the credit card page
2. En yakın ATM veya şube bilgisini bulun / Find the nearest ATM or branch
3. Mobil uygulama indirme sayfasını bulun / Find the mobile app download page

E-commerce

1. Belirli bir ürün arayın / Search for a product
2. Filtre kullanarak ürünleri daraltın / Filter the results
3. Bir ürünü sepete ekleyin / Add a product to the cart

Online Grocery

1. Bir market ürünü arayın / Search for a grocery item
2. Bir ürünü sepete ekleyin / Add a product to the cart
3. Teslimat bilgilerini bulun / Find delivery information

Food Ordering

1. Bir restoran veya ürün bulun / Find a restaurant or item
2. Menüden bir ürün seçin / Select a menu item
3. Ürünü sepete ekleyin / Add the item to the cart

Travel

1. Bir seyahat bileti arayın / Search for a travel ticket
2. Tarih seçerek seferleri listeleyin / Select a date and list trips
3. Bir seferin detaylarını görüntüleyin / View trip details

Students must ensure that participants attempt each task.

5. Data Collection

After completing the tasks, participants must fill out the System Usability Scale (SUS) questionnaire.

Students may collect data using:

- Google Forms
- Microsoft Forms
- Survey tools
- Paper forms (if necessary)

6. System Usability Scale (SUS)

The System Usability Scale is a standardized usability questionnaire consisting of 10 items.

Participants answer each question using a 5-point Likert scale:

- 1 – Strongly Disagree
- 2 – Disagree
- 3 – Neutral
- 4 – Agree
- 5 – Strongly Agree

SUS Questionnaire

Participants should respond to the following statements.

1. I think that I would like to use this system frequently.
2. I found the system unnecessarily complex.
3. I thought the system was easy to use.
4. I think that I would need the support of a technical person to use this system.
5. I found the various functions in this system were well integrated.
6. I thought there was too much inconsistency in this system.
7. I would imagine that most people would learn to use this system very quickly.
8. I found the system very cumbersome to use.
9. I felt very confident using the system.
10. I needed to learn a lot of things before I could get going with this system.

7. SUS Score Calculation

4

The SUS score is calculated using the following method.

- For odd-numbered questions (1,3,5,7,9)
- Score contribution = Response value – 1
- For even-numbered questions (2,4,6,8,10)
- Score contribution = 5 – Response value
- Then:
 - Sum all scores
 - Multiply the total by 2.5
- Final result:
 - SUS score ranges from 0 to 100

8. SUS Score Interpretation

General interpretation guideline:

SUS Score	Usability Evaluation
80 – 100	Excellent
68 – 79	Good
50 – 67	Acceptable
Below 50	Poor usability

The average SUS score across all participants should be reported.

9. Report Requirements

Students must prepare a usability evaluation report using writing guideline given before.

Recommended structure:

1. Introduction: Brief description of the website and its purpose.

2. Methodology

Explain:

- number of participants
- testing method
- tasks used
- data collection method

3. Participant Demographics

Include:

- age range
- gender distribution (optional)
- prior experience with the website

4. Task Observations

Discuss:

- difficulties users experienced
- common usability issues
- user feedback

5. SUS Results

Include:

- table of participant responses
- calculated SUS scores
- average SUS score

6. Usability Analysis: Interpret the results and explain what they mean.

7. Usability Problems: Identify at least 5 usability issues.

FACULTY OF ENGINEERING AND
NATURAL SCIENCES

8. Improvement Suggestions: Propose design improvements for the website.

9. Conclusion: Summarize the findings of the study.

10. Deliverables

Each student must submit:

- Usability Test Report (PDF)
- Raw SUS data (Excel / CSV / Google Sheets)
- Survey form link or questionnaire copy

11. Academic Integrity

- All collected data must be real and original.
- Fabricated responses will result in grade penalties.
- Each student must conduct their own independent study.

12. Recommended Tools

Students may use:

- QueryCode app
- Google Forms
- Microsoft Forms
- Excel / Google Sheets
- SUS Analysis tools
- Screen recording tools (optional)

13. Minimum Requirements Summary

Requirement	Value
Website per student	1
Participants per test	Minimum 20
Tasks per test	3
SUS questions	10
Final output	Report + dataset
Sending report	Revalent company via e-mail

Appendix I

No	Site	Category (TR / EN)	Web Address	Tasks (TR / EN)	Student Name
1	Akbank	Bankacılık / Banking	https://www.akbank.com	1. Kredi kartı sayfasını bulun / Find the credit card page 2. En yakın ATM veya şube bilgisini bulun / Find the nearest ATM or branch 3. Mobil uygulama indirme sayfasını bulun / Find the mobile app download page	ALAADDİN KOYUNCU
